

NORMAL NOTES

MAY CALHOUN

Carlton Prather, of the class of '17, visited friends at the Normal last Sunday and Monday. Mr. Prather was in service overseas for a year and traveled through the Alps, in France, Germany, Belgium and the British Isles. While over there he was connected with Headquarters Division and the 115th Engineers. He left Monday evening for his home in St. Johns, having been discharged in San Francisco last Friday.

Mrs. Bunch is here visiting her son Harry, who is taking summer work at the Normal.

Miss Mary Beckwith, Miss Thelma Harvison and Miss Marbury Henning, and Messrs. Craig Pottinger, Stephenson and Ray Ramsey enjoyed a picnic at Lake Mary Monday evening.

The dance which was to have been the opening event of the new auditorium had to be postponed last Friday evening due to the oil on the floor; but an informal dance was held in the Dining Hall under the supervision of the entertainment committee. The music was excellent, and there was a good crowd present.

The trip to the ancient Cliff Dwellings was a very successful affair. There were fifty students and teachers who made the trip. The Red Star line of cars and several other autos were used to transport the students from the campus to the cliffs and back for the nominal sum of \$1.25. Lunch was provided in picnic style by Mrs. Hanley, matron of the Dining Hall. The cars left the campus from 8 a. m. to 10 a. m., making the return trip from 4 to 6 p. m. Miss Walsh was the chaperone. A trip to the Grand Canyon is now being planned for the benefit of the students.

J. E. Bentel is serving on the jury this week.

Mrs. Parsons is leaving for Kansas City to visit relatives and friends.

Mr. Creager attended a board meeting in Phoenix this last Monday.

Miss Thelma Harvison and Miss Thelma Fay, and Messrs. Ray Ramsey and M. L. Johnson motored out to Lake Mary for dinner Sunday evening.

A trip to the Sunset crater and the lava beds is being planned by the excursion committee for Saturday. Due to this trip the dance that was to have been given in the new auditorium Friday evening was again postponed.

The trip that was to have been made by the Lowell Observatory Monday evening had to be postponed because of the inclement weather. It is hoped that the weather will be such as to render the use of the telescope possible some time this week. The students are very desirous of visiting the famous Lowell Observatory.

The Misses Stewart, Ryder and Eckel, and Messrs. Burrows and Campbell enjoyed a ride and picnic last Sunday.

Mr. and Mrs. James Logan arrived Wednesday to take the place vacated by Mr. and Mrs. Murphy as cooks at the Normal.

Francis Carr has returned from California and is visiting at the Normal.

AGRICULTURAL PROJECTS STOPPED; LACK OF FUNDS

On account of the veto of the agricultural appropriation bill by President Wilson, which he did to prevent the repeal of the daylight saving law, many projects laid out by the agricultural department were ordered stopped for the lack of funds.

Trappers of predatory animals, the rodent exterminators and plant industry men were called off until there should be funds provided for their work. An attempt was made to pass the bill over the president's veto, but it failed by some 35 votes.

It was the intention of Congress to repeal the "daylight saving" law after October 1, when there would be no more changing of clocks after that date. The president insisted that the clocks be changed twice a year as under the law passed during the war period.

LITTLE GIRL IN FALL FROM SECOND STORY WINDOW

The little daughter of Mr. and Mrs. I. P. Dillon, of Chloride, had a narrow escape from death or serious injury at the Beale Hotel on Monday night when she fell from a second story window to the ground, a distance of 18 feet. She was sitting on the window sill and leaned back against the screen, which had become unlatched, and was precipitated to the ground. When her parents got to her they found that she had been badly shaken up, but was unhurt.

Rev. Dillon and family departed on Tuesday to Maine, Coconino county, where they will spend a few weeks among the pines, later coming to Kingman to live.—Kingman Miner.

You will be able to sell that second-hand car of yours by inserting a small Want-Ad in The Sun.

HILLENS LEAVE FOR OLD HOME AT POMONA, CAL.

Mr. and Mrs. Robt. Hillen, who have lived at 202 E. Dale Avenue for nearly three years—Mr. Hillen being connected with the hardware department at Babbitt's—returned Thursday to their former home at Pomona, Cal. Their many friends here much regret their leaving, which was caused by the very severe illness of Mrs. Hillen's father, Geo. W. Wiley, of Pomona, whom she and her husband felt they must be with, and who has extensive business interests that Mr. Hillen will look after.

TAKING HIS MEASURE

If you were to estimate Cyrus Lazarus' business by the number of keys he has on his key-ring, you would have him in the strenuous financiering class.

HEAVY INVESTOR IN FLAGSTAFF PROPERTY

C. A. Clark has sold five of his houses—known as the old Clayton property—to C. H. Burlock, general manager of the Mossback mines, who bought them as an investment. Mr. Burlock has also bought the E. M. Brown home on West Aspen avenue, and will move his family into it. Mr. Brown moving into his house on North Agassiz street.

The Sun want-ads sell anything.

Words of Praise from a High Source for 'Top-'O-Peak' Brand Bottled Soft Drinks

Made with the
Purest Water
in the World

Endorsed by the U. S. Government

The following is copied, word for word, from the Yearbook of the United States Department of Agriculture, under the title of "Composition and Food Value of Soft Drinks."

"Nearly all general stores at crossroads and in small villages in the United States carry regularly a stock of bottle soft drinks, frequently simply designated as 'sodas.' The consumption of these products increases each year, and with the growth of prohibition it seems probable that their manufacture and distribution will assume very large proportions. During the few years just prior to the curtailment of the industry due to war conditions the sale of soft drinks in the United States amounted annually to over three billion bottles. Along with rural free delivery, the telephone, individual electric-light plants, and electrical appliances, the dweller in a rural community is able to purchase at the nearest general store a product which a few years ago was obtainable only at soda fountains in towns and cities.

"Flavors and condiments, well-known household articles, are used in soft drinks, and are of a varied nature designed to make the product attractive to the taste.

"In addition to being delectable, soft drinks have food value, due sometimes to their content of sweetening ingredients, which amounts to from 5 to 12 per cent of the total weight of the beverage, and in some cases, to the fruit extracts which they contain."
